

Canine Adult WELLNESS PLANS

At Taunton Road Animal Hospital, our goal is to provide our patients with the optimal care we would expect for our own families. Our Wellness Plans allow us to help our clients provide this care while also assisting your family financially. By running routine blood and urine testing yearly on your dog, we are able to detect and treat underlying health concerns early.

We have two different plan options to best suit the medical needs of your pet.

Adult plans are ideal for a pet above one year of age who has no known health conditions. This plan includes:

- Annual physical examination and consultation with the veterinarian
- Any required vaccinations
- Fecal testing
- A full blood panel (early detection testing)
- Blood parasite testing (Heartworm, Lyme and other tick borne diseases)
- Urinalysis

Advanced plans are for patients that may require more medical attention throughout the year and advanced bloodwork. The Advanced plan includes all services in the Adult plan listed above plus:

- A six month examination and consultation

With either plan, you have the option to incorporate a full dental cleaning into your pet's yearly care. For more information on everything included in our dental packages, please ask your veterinarian or receptionist.

ALL OF OUR WELLNESS PLANS INCLUDE THE FOLLOWING BENEFITS

- No enrollment or processing fees
- Unlimited nail trims
- 15% off flea/internal parasite medication
- 10% off microchip
- Two illness/injury exams
